

## **Oxford Reading Tree**

This is the reading scheme we would recommend using if your child has additional reading needs. You and your child might be familiar with these books as they have been sent home as a level reader for homework on occasion.

If your child can remember the level they were on, great! Start there!

If not, there is a link on the site which guides you through selecting the correct level or you can select by age. Please note that we select a **level easier** than our students' ability/age, so that they can read with fluency and become a confident reader. If they are struggling (sounding out the majority of words in a sentence or getting frustrated) with a book, please go down a level or more.

The link below will bring you directly to the page that allows you select the book by level or age. When you select your level, it will show you a selection of book covers. Before you can select and read the book you must register for free on the top of that page. It only takes a minute!
